

**2nd Workshop on Radiopure Scintillators for EURECA
RPSCINT 2009, 22 - 23 September 2009
Institute for Nuclear Research, Kyiv, Ukraine**

Kiev (Kyiv)

Metro (Tube, Underground) in Kyiv is one of the cheapest in the world, effective and well developed. Entrances to underground stations are marked by sign "M".

Taxi in Kyiv is rather cheap. Typical price from airport should not exceed 160-180 UAH, an average trip in Kyiv costs 40-70 UAH. The best way is to call taxi by phone. Drivers on street could ask much more.

Telephony To use public phones you should buy telephone card (ask in news-stalls, post offices, metro stations). You can buy (without any documents) a mobile phone number for 20-50 UAH, and then to add money on your account by buying a phone card or in a special machines. There are a lot of points where you can buy a number, cards. We would suggest the Kyivstar and MTC companies as the most popular in Ukraine.

Meal There are a lot of restaurants, cafes, pizzerias in Kyiv. One would not say it is cheap. If you find a place where you can eat for 80-130 UAH it is not so expensive

*Ukraine is a fast developing country. Despite considerable progress of last years, we have still a lot of different economic and social problems. You are kindly requested to **be careful** during your stay in Ukraine*

Contact phones of peoples (the Lepton Physics Department, INR Kyiv) involved in the workshop organization:
